

We should not change our State of Wisconsin no call list to a weaker version, so telemarketers can contact us. FCC should just leave us alone on this issue. The federal government wants the states to do more on their own, but if it is not in the federal government's interest then it needs to be changed? Telemarketing was a big problem in Wisconsin, but now it is much better with our law we have in place for this. I do not want to go to a weaker version to assist big businesses.
